Presents:

ETHICAL COMMUNICATION & DECISION MAKING IN AN INTEGRATED CARE ENVIRONMENT

with Jacqui Abikoff, LICSW, MLADC

A 3-hour training event Wednesday, December 6, 2017
9:00 a.m. – 12:00 p.m. (registration begins at 8:30 a.m.)
Epping Fire Station, 37 Pleasant St., Epping, NH 03042

PRESENTATION: The growing emphasis on integrated health care necessitates that a variety of providers and organizations from different aspects of the healthcare system work together on many new levels, presenting new challenges to all involved. This new approach brings together professionals with different roles, responsibilities, ethical codes and perspectives. To integrate effectively it will require that all participants understand the roles of all partners in the integrated care environment and how they relate to each other. This workshop will engender discussion of what we know about each other, how we define our role, the roles of other providers and our patients in the health care system. Additionally, we must identify how to operate efficiently, being mindful of cost containment and patient empowerment in this new health care delivery environment. Most importantly, it will address how our varied communication styles and confidentiality requirements impact one another and our patients and it will identify strategies for reducing these barriers from interfering with providing the best care possible. At the end of this workshop, participants will learn to: Identify the different roles of providers on an integrated care team and the differences in the type and scope of information required to be shared consistent with each role; Understand the roles of HIPAA and CFR 42 Part 2 in the sharing of protected healthcare information; and Understand how to balance the provider's need to know, with the patient's rights to privacy and self-determination.
